

ELECTRICAL INSTALLATIONS

At the January 2007 Board meeting the Board of Supervisors voted to revise District regulations regarding electrical installations in the lake maintenance easement. The following requirements **must** be met for electrical installations in lake maintenance easements:

CRITERIA FOR ALLOWING ELECTRICAL INSTALLATIONS IN LAKE MAINTENANCE EASEMENTS

- A. Install a disconnect switch, painted red, mounted on a 5' high concrete column at the easement edge. This switch must cut power to all electric within the 20' easement.
- B. All circuits shall be protected with GFCI circuit breakers.
- C. All wire shall be installed in rigid PVC conduit buried 36" below grade.
- D. Commercial, marine grade products shall be used.
- E. All work shall be designed by a Florida registered Engineer.
- F. All work shall be permitted and installed by a licensed electrical contractor (not the home owner; home owners are allowed to pull their own permits).
